

Annexure C-5(5.2.2)

Solid Waste Management

Waste management is an organized way to deal and dispose of various types of waste such as solids, Liquid, biomedical, chemicals radioactive and E-waste. It not only removes wastes but also makes waste reusable and recyclable which keeps our environment clean. Our institution strictly follows the policy of maintaining the campus waste free and Eco -friendly. The biodegradable and non biodegradable waste is collected in separate dustbins kept at different places of college campus. A Vermicompost pit has been constructed in the college campus for the decomposition of biodegradable waste in to vermicompost which is used as manure for the plants of campus garden. A sanitary Napkin vending machine has been installed in the Girl's common room and toilet. Recycling items like old newspapers, torn books and other waste papers are given to paper scrap dealer. Biological waste from life sciences laboratories is decomposed through Vermicompost unit. The most eco-friendly and cost effective method for e-waste disposal is its reuse. The college maintains its entire computer peripherals, old computer system in safe store within the campus. Defective computer items are repaired/upgraded by replacing their parts.
